JL - exhibits for proposed Hanman depositions questions HM 7/24/79

Herewith the copies of records I had with the last draft of proposed questions and a larger file I have not gone over but had copies set aside for possible use relating to Ruby. This is to say that I have not recently read the Ruby records at all and do have other uses for them in the future.

Ida is too far behind on other things, including some copying, so I'd like these all back when you have no further need, hopefully still segregated as they now are.

There may well be other proposed exhibits but I did not have them attached to the pages of questions. They are in separate files, by the name of the persons. If you need or want any of them please give me the identifications and I'll send them.

There does not now appear to be any point in my following up on some of the things I was working on and I'm not going to try to keep them in mind. One is in a subject folder I have identified as "Banks", the others in "Church and 94 folders".

There are far from all the Church records of those of 94 identifications, merely those I'd located and planned to use.

There now are no copies with the ribbon copy of the draft questions on which I'd planned to make corrections, changes, etc. I will have no independent recollection of them by the time we get around to discussing them, if we do.

If we do is when I'll read what I've done. If I do it sooner I'll forget and if we don't use them there will be no point.

It is necessary for me to be less profligate with the making of copies. Since getting the xydex machine we've made about 150,000 copies, in addition to those made at Penta Press. Our machine has more copies on it than any like it of which the service man knows. It has outlasted his expectations as well as his experiences. I will not be able to replace it and I shudder to think of the sources of paying for any major repairs, given what mere maintenance costs.*

This is why I did not waste or risk wasting copies not necessary if you decided against using them.

* Of this large number of copies I have a
more drawer and less than a half of King copies
for my possible use and two full drawers of JFK
stuff much of which I'll not have any personal
use or need for.
